BUSINESS & PROJECT CONSULTANCY

Formed in 2013, we are growing fast, developing a strong team and diverse client base, including several large multi-national organisations. We provide a high quality bespoke service to all clients, with integrity and professionalism at the heart of everything we do.

Director and Consultant Greg Riddle has over 22 years' experience in the construction and aquaculture sectors, working for main contractors, sub contractors, clients and designers. A civil engineer by profession, he has a proven track record in front line site management, pre-construction planning, procurement, contract administration, design and engineering, project management, business development, tender and bid writing.

Sector Experience: Civil Engineering, Construction, Water and Wastewater Treatment, Roads, M&E Installation, Aquaculture

Director and Consultant Sarah Riddle has over 20 years' experience in senior Commercial, Sales and Operational roles, gained with leading aquaculture companies, food processors and manufacturers, and wholesalers. With experience of managing multi-£m accounts and negotiating multi-£ contracts, as both buyer and seller, she is a born leader who gets the best out of people and has a proven track record in growing both sales and profits.

Sector Experience: Aquaculture, Food Production/Processing, FMCG, Retail, Wholesale, Construction Materials

Project Manager Shona MacLeay is a Chartered Civil Engineer and highly experienced multi-disciplinary Project Manager, Shona has recently joined our business from SWECO, Europe's leading architecture and engineering consultant. She has over 18 years industry experience, working for main contractors, local authority, clients and designers. Her skills also include design co-ordination, structural appraisals, structural design, site supervision, and contract administration.

Sector experience: Flood Protection, Bridges, Marine Works, Roads, Aquaculture

We work closely with a network of sub-consultants and associates who bring additional skills and experience as required, in the fields of: Information Technology; Health and Safety; Structural Engineering; Environment; Architecture.

We are in an unrivalled position to deliver successful projects in the Aquaculture and Fish Processing sectors due to our unique skills and experience:

- Managing large and complex projects.
- Managing interfaces between UK and multi-national designers and contractors.
- Understanding and refining production and operational processes.
- Leading large multi-disciplinary teams from different cultures.
- Integrating specialist plant and equipment, IT and control systems.
